

CDMO for the Development and Manufacturing of Vaccines and Prophylactic Antibodies

Innovation to improve global health

Extensive Capabilities from Preclinical to Commercial BSL-1 and BSL-2

- **Mammalian and Microbial:** mAb, fusion protein, nanoparticles/VLP, OMV, conjugate
- **Viral:** live attenuated viral, viral vector
- **pDNA/cRNA/mRNA**
- **Fill & Finish:** liquid, lyo, suspension, emulsion
- **Standalone Services:** Cell line/strain/virus development and GMP banking; process development, formulation development, biosafety, R&D material generation for vaccines and mAb

WuXi Vaccines, a subsidiary of WuXi Biologics, focuses on vaccine and prophylactic antibody development and manufacturing. With multiple commercial vaccines manufactured at globally GMP-certified facilities, and over 70 projects in development, WuXi Vaccines brings a level of expertise, experience and state-of-the-art facilities to enable your project to be conducted right the first time. As an industry-leading CDMO, we provide world-class integrated development and manufacturing platforms to expedite your preventative products to the clinic and the market.
